

KnowEscape: Analyzing the dynamics of information and knowledge landscapes

TD1210

Start date: 26/04/2013

End date: 25/04/2017

Year: Starting

Andrea Scharnhorst

Chair

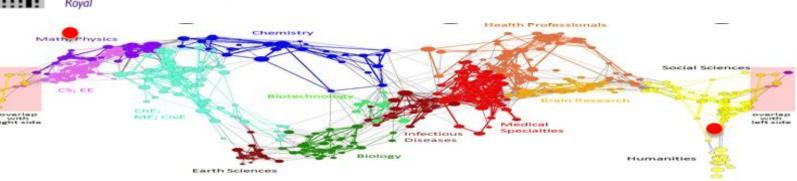

Royal Netherlands Academy of Arts and Sciences

PANS Royal

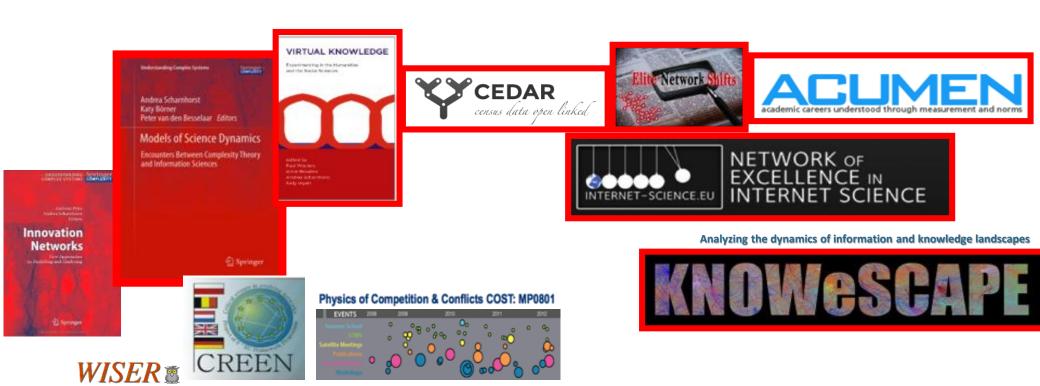

Web Indicators for Science, Technology & Innovation Research

Andrea Scharnhorst – CV

Head of eResearch at DANS and scientific coordinator of the Computational Humanities programme at the eHumanities group of the Royal Netherlands Academy of Arts and Sciences (KNAW) – DANS=Data Archiving and Networked Services Institute (DANS)

Scientific context and objectives

We find them at different ordering enhance. Different data models for their metadata Map of knowledge resources ve in different ordering schemes

Knowledge maps as interfaces to collections

(1/2)

Scientific context and objectives

DigHum

InfSci

Research directions:

- Data models, data mining, pattern recognition
- Dimensions of knowledge spaces & classifications
- Visualizing knowledge spaces
- navigation
- Phys//Math SoS Information seeking behaviour CompSci Implementing knowledge maps in

Consortium between IR, DigHumanities and statistical physics

Working groups

- 1. Phenomenology of knowledge spaces (Slavic, Thurner)
- 2. Theory of knowledge spaces (Richmond, Ahrweiler)
- 3. Visual analytics of knowledge spaces knowledge maps (Lambiotte, Akdag)
- 4. Data curation and navigation based on knowledge maps (Gueret, Mutschke)

Future Plans and Challenges

- Mixing the disciplinary composition in the WG's DONE
- Satellite meeting at major conferences ONE THE WAY
- Site visits in archives/libraries hand's on demand-wise MUNDANEUM
- Site visits at lab (workshops, STSM) hand's on method-wise –
 Think tank ESR PLAN
 - Managing growth
 - Establishing mode of working in WG's
 - Establishing STSM programme
 - Coordinating research activities
 - -> national projects
 - -> mutual shared objects/methods
 - Coauthoring long term
 - Proposals
